KEY DIFFERENTIATORS

- Forward-deployed, embedded delivery
- Applied AI and data engineering under one roof
- Human-governed AI with full data lineage
- Senior data science and engineering leadership
- Fixed-fee, outcome-based pricing
- Oklahoma-based, client-proximate

LEADERSHIP DEPTH

- 20+ years enterprise energy data science
- PhD-level machine learning & applied research
- Full-stack platform & systems engineering
- Strategy, capital & go-to-market

Who is Helix?

Helix Strategies is an applied AI and data engineering firm. We build the data foundations and AI systems that operators and enterprises can trust in production, working forward-deployed inside your environment to turn fragmented data into traceable, human-governed decisions.

“ **Real systems, built for real work, deployed inside your operation.** ”

CORE CAPABILITIES

- Artificial Intelligence Business Solutions
- Machine Learning & Deep Learning
- Advanced Statistical & Bayesian Modeling
- Predictive Analytics
- Causal Inference & Experimental Design
- Time-Series, Sensor & Operational Data Science
- Anomaly Detection & Failure Prediction
- Natural Language Processing
- Computer Vision & Document Intelligence
- Agentic AI & LLM Systems
- Foundation Model Fine-Tuning
- MLOps & Model Deployment
- Data Engineering
- Data Science & Analytics
- Unified Data Platforms & Integration
- Data Governance & Lineage
- Business Intelligence, Analysis & Visualization
- Software & Data Architecture
- Custom Software & Application Development
- Systems Integration
- Cloud & Data Infrastructure
- AI & Data Readiness Assessments
- Technology & AI Strategy
- Cybersecurity & Data Governance Advisory
